ICOM M801 v M802

Although the M801E and M802 look the same that is where the difference finishes.

- The M801 is housed in a more robust housing with heavy duty connectors
 - Ideal for the marine environment.
- By using the latest DSP technology
 - The M801E has better receiver performance.
- The M801E is a fully compliant class 'E' DSC unit
 - Offering a full range of DSC features.
 - The M802 has limited range of DSC functions.
- The M801E is CE approved where the M802 is not
